

What is the blandest album in my CD collection, I wonder. I think 'Steeler' by Steeler is a good contender. It's a fitting band name though, as the band do indeed seem to be steeling other ideas from similar 80s metal bands. The band Steeler, who steel and who released their album 'Steeler'. These guys REALLY like steeling. It's like Black Sabbath loving black sabbaths, with their album and song of the same name, the difference being black sabbath is a good idea. A more honest name for the band would be 'We Steal Ideas And Luv It. Not Only That, Our Material Is Pretty Dull'. Or WSIALINOTOMIPD. Not a catchy name, far from it, but you could call the band the made up word 'Wasiya-linoto-mi-ped.' Not a word I'm familiar with, maybe it's Spanish. Let's try harder to make a catchy name. How about Steeler of Ideas, Literally. Or Soil. Nope, because there is a band called Soil already, making the thievery even worse. Ok, ok, Steeler don't LITERALLY steal ideas, I was exaggerating because I couldn't think of another word beginning with L. Steeler of Ideas, Llama? What's that mean? Nothing, I was stuck.

On second thoughts, I do think the band name 'Llama, the Steeler of Ideas' is fairly creative. It doesn't sound SERIOUS, but for a nonconformist indie pop group? I think it's great! If you do want to make the band more tough, you could have the very power metal sounding 'Dragon, the Steeler of Fire.' The death metal version would be 'Zombie, the Steeler of Brains' and you know what? I think the Llama idea is best. To be honest, I'm sick of bands like Cannibal Corpse mentioning zombies and brains, why not get in touch with your silly side and write a song about llamas? Llamas stealing, llamas giving back to society, I really don't care. The Steeler album is notable for being Yngwie Malmsteen's first album he appeared in, but that doesn't make it good. In comparison, my very first idea for a comic was about a guy obsessed with ham and that was it. Worth reading? Probably not. Making things worse, it was an idea I had in my mid 20s, you'd think my brain would have developed by then. Here are some of my old ideas: 'Ham? Not again!' I'm not exaggerating.

Allmusic.com gave the album being discussed 4 stars, though! Maybe the site admires the band's honesty with their name. But I mean I was honest when I said my comic was rubbish. 'Please, no more ham!' Wow, let's give that four stars, too, along with my very first doodles of trains. Ok, ok, NOW I'm making the album sound bad. It's not that bad, it's just meh. The food equivalent would be plain crisps or chips with no ketchup. And you know what? I eat lots of crisps and chips! I can't remember the last time I had chips with absolutely nothing with them, though. If I was offered some I would remind the cook to get me at very least salt and vinegar, but you know what? Salt and vinegar isn't very healthy. I don't know how I can link HEALTH with the album, I guess I need to do some thinking for the first real time in this review. Ok, Steeler aren't salty and therefore they are healthy, and I think all band members are still alive, suggesting they are healthy, too. There you go.

Changing the subject, how are my hives seemingly caused by stress? I'm not sure to be honest. I think they're at least very slowly getting better. Nothing to worry about that could make the condition worse, then? Nope, I have a dentist appointment coming up. I never like going there, just like 99.999% of the population (the other 0.001% are most definitely mentally ill) but the upcoming visit will be worse than usual as yesterday I had a nightmare where the two dentists told me to open my mouth. When I did, they shouted 'WHAT THE HELL IS THAT?!?!?!' It was hard to

say as I was sleeping at the time obviously, but I think I was screaming. Oh yes and what to score the album? Hmm... 7/10. Or maybe a 6.5. Sorry, Yngwie. I would say sorry to the other band members, but I have no idea who they are. And on that further honest note... Bye!
