

Today, I'll be reviewing 'Analphetapolothology' by Cap'n Jazz. That's surely one of the longest words there is. Interestingly, Cap'n has the same amount of syllables as Captain. Really the band should have abbreviated the album title. And what does it even mean?? I know what 'an' means, I even know what 'alphabet' means, but 'apolothology'?? Apologise to thology? Apologise to the theology could work (as in apologise to God), but that's not what the album is called. And even if it was, an alphabet, apologise to God? Errr... ok then. Wikipedia points out that Cap'n Jazz is sometimes written as caP'n Jazz, but again, get your priorities straight. Naturally the band are emo, not jazz, but that's another matter. If the almost but not quite holy album wasn't bad enough, you would't BELIEVE how long the title of their debut album is. Let's count the amount of words. Yep, it's 28. 28 words. Imagine asking for the CD in a music store. It would be like 'Hey do you have... what's it called? Err... Do you have something about burritos and kung fu?... No it's forks and kites...' (All words in the album title). 'Oh forget it, just get me some Hum or some Zep.'

You could compare the epic album title to the ramblings of some crazy person, and the fact the band's label was called 'Man with Gun' only makes things more disturbing. Imagine someone waving a shotgun and shouting 'Cards in spokes! Banana peels! Egg shells!' (More album title words). That's how I picture the band, and can you blame me? Even so, I always thought emo was nice music. I guess waving a deadly weapon and screaming is emotional too, but really, I'd call it screamo. And if THAT wasn't confusing enough, the album's also known as 'Shmap'n Shmazz'! That's no album title abbreviation, those two words (which were made up) have absolutely nothing to do with the burritos and such. If these so called musicians act this way all the time, it's only a matter of time until they get punched in the face. I THINK obsessive compulsive personality disorder is the most common personality disorder, and people with such a condition need the world to have cold hard logic. Let's just pray the OCD sufferers aren't antisocial, too.

Out of curiosity, let's turn the lengthy album name into initials. SO, we have BIPFBSCITSABKKFTBPWSOAESWTTO. Something about biscuits? You know what? I prefer the longer version. Anyway, let's go back to the alphabet album. I've just this minute learnt that it's exactly the same as BIPFB, just with more tracks. But there's no way you could blame me for not knowing that, for obvious reasons. Do you think I like researching gibberish? Moving on, do I like the semi-religious album? With track names such as 'Troubled by Insects', it's far from a badass release, but I guess the melodies and all that stuff are pretty good. It's not jazz music, of course it isn't, but if the musicians know what jazz is and they once captained a boat, that sounds plausible enough to me. Perhaps Emo Motorists would be a more fitting name, but in comparison, the guys in Megadeth never killed anyone, certainly not a MILLION people, and the world is a better place because of it. You don't have to take such names literally.

Did you know with the alphabet album, you get a good 99 minutes and 21 seconds of music?? The first CD as explained is mostly the poorly spelt biscuit album, but the second CD features a whole bunch of songs from other releases. Usually with such compilation double albums, the first CD is of all the good stuff and the second is basically the first but mixed in a different and furthermore worse way. Again, not true here. I must give the 2nd CD a listen! I couldn't write an album review without even listening to it?? No, too far, I'm listening to it, now. Ok, it's basically in the same style

as the preceding stuff, so in this very special occasion, I've decided I don't need to finish listening before writing this review. Bit weird, isn't it? Some may say I've reached a new low. Anyway, the album gets a solid 9.5/10! It's very good! Bye!
